

HF750 Headworn Microphone

*Newly designed
microphone head*

The HF750 series features a tight cardioid pattern and frequency response engineered for professional voice performance applications under high sound pressure levels.

Much consideration has been put into the physical design of the HF750. The flexible boom arm enables the user to position the microphone for optimum sound and gain before feedback. Cable runs neatly to the back of neck for best concealment. The headband is highly resistant to corrosion and is easy to clean.
