

HT747 Headworn Microphone

Features:

- Flexible Boom Arm
- High-Quality Easy-Maintenance Headband
- Great Acoustic Performance
- Bright Attractive Colors

Rugged yet sleek looking, the HT747 boast of exceptional clarity, allowing it to "cut" across a thick mix of sound. It has a supercardioid polar pattern response, which gives very good rejection of surrounding noise.

Microphone capsule are protected from moisture by plastic injection. Suitable for both hardwired and wireless operation, it is also designed to work with the windscreen, which comes supplied.

Available in black as well as a selection of bright attractive colors, it looks great anywhere, anytime.

Recommended for aerobic instructors, stage presenters, performers & broadcasters.
